

HEAR FROM OUR FAMILIES

NEW IN 2023:

RONALD MCDONALD HOUSE AT CHILDREN'S HOSPITAL OF RICHMOND AT VCU

With 3,285 square feet of new space, this facility allows us to consolidate our programs to one space at our highest volume medical partner. We are transforming how we keep families close during their most trying times.

The In-Hospital Ronald McDonald House opens in 2023 and will provide space for families to relax, enjoy a meal, or participate in calming activities. Here compassionate RMHC Richmond staff and volunteers will present regular programming including Lunches with Love and snack services, warm dinners, and interactive activities such as music, haircuts, and yoga sessions.

"As soon as I walked through the door, I was at peace and could relax."

— Maritsa,
Joshua's Mom

"These fun adventures gave me something to look forward to during a hard week!"

— Abby

"It is hard to make a Hospital feel like home, but RMHC does just that."

— Mervin,
Grayson's Dad

2022 Impact Report

"You made it possible for us to be able to serve more families each year."

In 2022, Ronald McDonald House Charities of Richmond found a sense of returned normalcy to day-to-day life and operations within our programs.

The number of people we served matched and then exceeded pre-pandemic levels. From more than 9,000 Lunches with Love served to 2,000 nights in our House and in-hospital Sleep Rooms, **RMHC was there when families needed us most.**

The demand for services from our community and program expansions have reaffirmed our path forward and commitment to meet families where they are during their most vulnerable days and hours.

Our community of supporters stands with us as we work to remove financial and logistical barriers to pediatric specialty and acute care. Your support helps provide equity of access to life saving and changing care as well as critical food access to fight food insecurity in hospitals across Richmond.

You made it possible for us to be able to serve more families each year.

We are poised for program expansion and excellence in 2023, and we are humbled by our service to the brave parents and children we walk beside every day to keep families close, safe, and ready members of their child's care team.

Kerry K. Blumberg
Chief Executive Officer

AT THE HOUSE

The Ronald McDonald House on Monument Avenue is our cornerstone program that provides a haven for families who must travel while their child receives treatment at local medical facilities. **We provide lodging, meals, transportation to appointments, and other program support to families staying with us.**

INSIDE THE HOSPITAL

Ronald McDonald Family Room®, Happy Wheels, Lunches with Love, and the RMHC Sibling Center are all unique programs that offer family-centered care and **services within hospital walls to families with children receiving medical care at hospitals in the Richmond region.**

Ronald McDonald Family Rooms

This program serves families near the pediatric units in hospitals, just footsteps away from their child. Our Family Rooms provide a place for parents to rest and recharge in order for them to remain strong for their children.

Happy Wheels Hospitality Cart

Our friendly volunteers and staff roll carts through the halls at CHoR at VCU and Bon Secours St. Mary's Hospital, distributing toys, activities, toiletries, snacks, and coffee.

Lunches with Love

To combat food insecurity, volunteers prepare nutritious meals which we deliver to pediatric and neonatal units five days a week. Additionally, local caterers, and restaurants deliver on weekends.

RMHC Sibling Center

This space allows parents to fully focus on the care of the patient while their siblings engage in age-appropriate play, arts and crafts, and hands-on learning opportunities.
